## Vandals Cause Damage to Sports Equipment

Stole Ferstay's Bus And It Is Presumed Drove Vehicle Into Baseball Backstop Raining It; Bus Suffers \$300 Damage.

Some person or persons unknown on Monday evening, Aug. 7, stole the Ferstay Bus at Blairmore and drove it to the Coleman sports field where they purposely drove it against the baseball backstop, absolutely ruining it. The bus was then driven to The Flat, where it was abandoned.

It is stated damage to the bus was \$300. The backstop was knocked to the ground, timber being broken and the wire torn, and Art. Fraser, sports president, estimates damage at \$60. As if enough damage had not been done, some kind soul helped himself to part of the timber.

A serious view is being taken of the matter by the town council, who originally sponsored the movement that resulted in the formation of the Sports Association. Money collected from the members had been spent in sports improvements, the backstop being one of these improvements. To have some irresponsible adults deliberately destroy these improvements is something that is not going to be condoned.

Police are making an energetic search for the guilty person or persons. It is to be hoped that once they are found that in addition to being given a sentence they be made to recompense the sports association for every cent of damage.

## Town Of Coleman

NOTICE is hereby given, under the provisions of the Tax Recovery Act, 1938, the Town of Coleman will offer for sale by Public Auction on Wednesday, the 27th day of September, 1944, at 10 o'clock in the forenoon, at the Town Hall, in Coleman, Alberta, the following lands:

Lot	Block	Plan
12, 13, 14, 15, 16, 17	5	820-L
2	A	2446-AA
18	B	2446-AA
19, 20	B	2444-AA
15	15	6808-CU

Each parcel will be offered for sale, subject to the approval of the Minister of Municipal Affairs, and subject to a reserve bid and to the reservations contained in the existing certificates of title.

Terms, Cash. Redemption may be effected by payment of all arrears of taxes and costs at any time prior to the sale.

Dated at Coleman, this 24th day of July, 1944.

G. LEES,  
Secretary-Treasurer.

## GOVERNMENT LIQUOR CONTROL ACT OF ALBERTA

### APPLICATION FOR BEER LICENSE

PUBLIC NOTICE is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a license to sell beer by the glass or open bottle for consumption in conformity with the provisions of the above Act and regulations made thereunder, with respect to the following premises:

On ground floor of room in West side of premises known as Empire Hotel, said Hotel situated on Main Street, on Lots One (1) and Two (2), Block Eight (8), Plan Coleman 820-L, in the Town of Coleman, Province of Alberta.

Dated at Coleman, Alberta, this 10th day of August, A. D. 1944.

FRED H. DAVIS,  
Balmoral Hotel, Calgary, Aug. 10-44 Applicant and Owner.

### CARD OF THANKS

I express by sincere thanks to my many friends for their expressions of sympathy on the death of my dear son William, killed in action on July 25, John Nincman.

This time, we stop fighting for our lives, let's not stop fighting for our way of life.

## SOUTH SIDE OF ARENA FENCE COLLAPSES

At the week end, rot and high wind took their toll of the fence at the over-air skating rink and the south side collapsed. It is several years since the fence was erected and the posts were known to be weak, as rot had eaten into the posts at their base.

## Search For Anton Kahout Still Unsuccessful

\$200 Reward Offered By Mrs. Kahout.

Despite continued search by the RCMP and friends, Anton Kahout, missing since Aug. 3, has not been found.

Last seen wearing a heather brown sweater, black denim trousers and a light cap, he went berry picking at York Creek just south of Coleman. He has suffered from amnesia in the past and may be unable to give information regarding his name or address.

Mrs. Kahout is offering \$200 reward for information leading to his return.

## Local Committee Supervises Sale Of Navy League Tickets

Elsewhere in this issue is an advertisement asking readers to support the sale of Navy League of Canada (Alberta Division) raffle tickets. First prize is a \$10,000 bond plus a treasure chest. Other prizes are also listed.

Coleman has been organized for the sale of these tickets and a committee comprising A. Balloch (chairman), F. Abousaffy, W. Dutil and J. MacNeill has been formed.

Fifty books have been secured and they have been distributed to practically all the local stores along with a brightly colored poster listing the prizes.

The funds secured from the sale of tickets will be used to erect hostels on the Pacific coast in readiness for the armed forces who will soon be sent to the Pacific war theatre once the European conflict has been successfully concluded.

## Soldiers' Letters

The following portions are taken from a letter received by Mr. and Mrs. Arthur Jones from their son Cpl. Jones, showing that he has been participating in various sports with a great deal of success:

"We had our station sports on Saturday, and yours truly managed to win 25 shillings. I was entered only in the running broad jump and the shot-put. In the broad jump the county champion came first with a jump of 20 feet 2 inches. The second was 19 feet 1 inch, and I came third with 18 feet 11 inches. In the shot-put, which weighed 16 pounds, the winning heave was 33 feet 9 inches. Mine was 6 inches less. I was the only Canadian competing. The station was divided up into Wings like the Pass sports used to be, each competing for a cup. When the sports were all over we had dancing on the green.

"Last Monday I was chosen for a rifle team and managed to make a good score. Those who took first and second places were both named Jones. Which just goes to show you can't keep up with the Joneses. Tonight I have to get a bit of practicing done for another competition. So this is all for now."

COLEMAN BOY REPORTED GERMAN WAR PRISONER

Sergeant George Kroosing, reported missing on June 6, has now been officially reported a prisoner of war. This information was sent through the Red Cross, Geneva, Switzerland, although the number of the war camp was not stated. Doubtless this information will soon be made available to relatives and friends.

## Albert F. Short Passed Away On Sunday After Brief Illness; End Four Years Term As Vice-President Of Local Coal Companies

Death Came At 12.30 Noon; Entered Service of McGillivray Creek In 1912; Funeral Held Wednesday At Leyden Funeral Home, Calgary.

Lethbridge Herald Engraving.

Albert F. Short, 50, vice-president and secretary of International and McGillivray Creek coal companies, passed away quietly at his home here at 12.30 noon on Sunday after an illness of only a few weeks. Deceased showed the first sign of his illness while on a business trip to Calgary recently. He was brought home and failing to respond to medical treatment he was taken to Vancouver where an operation was performed. He was brought back home two weeks ago with little hope held for his recovery.

Born in London, England, in 1894, he was educated at Clark's College in that city, after which he came to Canada.

Memorial service was held at the United church, Coleman, at 12.45 noon on Tuesday, following which the remains were conveyed by train to Calgary. Burial service was held at 2 p.m. Wednesday at the Leyden Funeral Home, interment being in the Burnside cemetery.

Surviving are his wife, Elizabeth; one daughter, Frances, and one son, Allan; also a grandson, Roger A. F. Short; Brothers George of Blairmore, William H. of Lethbridge, Sidney C. of Coleman, and one sister, Mrs. W. J. Combes, of Vancouver.

Aided Mine Development The late Mr. Short had led an active life in the Pass industrial field. He first entered the services of McGillivray Creek Coal & Coke Co. in 1912 as an accountant, and in 1916 was appointed secretary. Along with the late George Kellock, then president of McGillivray Creek, he helped guide the destiny of the company till it became one of the largest coal mines in the province. He carried on in the capacity of secretary till the joint management of McGillivray Creek and International companies was effected in 1935, when he was appointed secretary of both companies.

On October 17, 1940, at a meeting of company directors he was

## Shamrocks Defeat Hillcrest In Softball Play-Off

The Coleman Shamrocks played the Hillcrest Aces on Monday, August 14, at Coleman sports field in their first semi-final game.

The first four Shamrock runs were made by Clary, Cocelloni, Gianisario and Dick, but were soon tied by the Aces. Then home-runs by Soroff and Gianisario brought the score to 4-4. In the first of the ninth the Aces brought in one run before they were retired. This made the score 5-4 for the Shamrocks and the playing of the last of the ninth inning unnecessary.

The war of arms will decide what nations are to shape our future. The war of ideas will decide what thinking in the nation is to give the future shape.

promoted to the position of vice-president of both companies, succeeding to the position of the late George Kellock, who had died on September 4, 1940. He held that position till his death on Sunday last.

### Sports Booster

In the sports world he loved to go out on a fishing trip with his friends. He was a member of the tennis club for a number of years as well as a member of the badminton club. During Coleman's heyday in the provincial hockey world he was a member of the executive and gave many hours of his time in securing good players and promoting the team. His interest was not confined to senior hockey teams, but he boosted the juniors with his regular attendance and support. He was considered one of Coleman's oldest curlers and was active in this game up till last year and had voiced his intention at the close of last season to have a rink this coming season and to use his office in aiding the curling executive in its efforts to build a new curling arena.

He was a member of the Coleman War Finance Committee and his advice and guidance will be sorely missed by the committee. By various means he made the task of the war finance committee lighter. He was also a Past District Deputy Grand Master of the A. F. & A. M.

### Funeral Services

Following a brief service at the home the cortege moved to the United church, where a memorial service was held. Rev. G. A. Ketyls took as his text, "Ye know that labors are not in vain in the Lord," laying tribute to the many acts so willingly done by the departed for the good of his community and stressing the thought "Share ye one another's burdens."

Representatives of the Masonic Order formed a guard of honor from the church to the station, from which the remains were taken to Calgary for interment. Pallbearers, members of Summit Lodge No. 30, A. F. & A. M., were A. E. Graham, J. A. Park, W. S. Purvis, A. A. Fraser, W. Vincent and J. O. C. McDonald.

The wealth of floral tributes suggested the high esteem in which the late departed was held by his friends.

The organ music was ably supplied by Mrs. E. Salvador, who played "Requiem" and "Prayer." The hymns, "Unto the hills do I lift up my eyes," "Nearer, my God to Thee" and "Abide with me," were family favorites.

To his sorrowing widow, Elizabeth, his daughter Frances and son Allan, the heartfelt sympathy of the community is extended.

## Local Air Cadets Receive Efficiency Shield

The executive of Summit Squadron No. 73, Air Cadets of Canada, received the Efficiency Shield for Southern Alberta, won by the local cadets June 6, in the mail this week.

It was received by President Chris Rogers, who has turned over to PO Percy Dickson, with instructions to put it on display in a local store window.

It is a handsome shield and this is its second year of competition. Lethbridge cadets having won it last year. The name of Summit squadron has been engraved on one of the miniature shields.

Help your country to victory—enlist now!

### THEATRE NOTES

"His Butler's Sister," a gay comedy-drama starring three favorites—Deanna Durbin, Franchot Tone and Pat O'Brien—opens at the Palace this week end. A small town girl goes to New York to visit her brother, who is a butler to a famous composer. Complications arise when Miss Durbin tries to gain an audition with the great man. Deanna Durbin's lovely voice carries many musical numbers, but it is her ability to do comedy that makes "His Butler's Sister" an excellent piece of family entertainment.

## Tributes From His Fellow Citizens

In the passing of Albert F. Short Coleman has lost a true and faithful citizen. Having been in civic office for many years, I had the opportunity to transact civic business with him on numerous occasions, and found him at all times honest and just. While working in the background he supported a number of community enterprises and possessed a strong civic pride in his home town. He never failed when called upon to preside at civic functions, and his loss is keenly felt by all who knew him.

Upon behalf of the town council and citizens of Coleman I extend to the bereaved family my deepest sympathy in their deep loss.

FRED ANTROBUS, Mayor.

In the passing of Mr. A. F. Short, Coleman lost a respected and valued citizen of the highest calibre. His keen business ability and enthusiasm for the interest of the town has long been a spur to urge his townsmen on to make Coleman a place "on the map." In business relations we found him pleasant and congenial and his loss is a real misfortune.

F. H. GRAHAM.

In the passing of Albert F. Short, one recalls many pleasant associations with him in the business and social life of Coleman. His faithful and efficient application to his duties, from the time he commenced with the McGillivray company as a young man, eventually rising to the executive position as vice-president, brings admiration for his sterling qualities and persistence of effort. I am indeed grieved to hear of his death.

H. T. HALLIWELL.

An acquaintance of over a quarter of a century has ended; the passing of the late Mr. Albert F. Short closes a chapter of business and community activities of an outstanding character.

He was a citizen ever ready to assist in any activity which would benefit the people of the Crows' Nest Pass, and I feel sure I am voicing the opinion of the residents of the "Pass" when I say that he will be sadly missed.

May the Grand Architect of the Universe grant our deceased friend Everlasting Peace.

W. H. CHAPPELL.

It was with sincere regret that I learned on Sunday of the passing of one more of my old time friends with whom I have been associated for a number of years, both in business and in Masonic circles.

Albert, as we knew him, was a very popular Mason, and Summit Lodge No. 30, A. F. & A. M., owes a great deal to him for its life and prosperity in these last few years. The town and district is left poorer by the passing of such men. To the family I extend my deepest sympathy.

GEORGE PATTINSON.

In the passing of Albert F. Short the local coal companies have lost a faithful official, Coleman a valuable citizen, his friends a true friend. In my relations with him for more than thirty years I had continuous privilege to value and appreciate his exemplary tenacity to work, his fair play in business and sport and his sincere and invaluable friendship always.

J. S. D'APPOLONIA.

Try break through to total victory in our lifetime, a lot of us will have to break through the habits of a lifetime.

## Canadian Elks Adopt Nursery In Surrey, Eng.

Another residential nursery nestled in the British countryside for little Londoners bombed out of their homes, has been adopted by the Canadian and Newfoundland Elks through the Canadian Committee of the Save the Children Fund.

Named "Highcroft" and located in Surrey, the nursery is near enough to London to make it possible for parents to visit their children. A private home in peacetime, and turned into a nursery by its owner three years ago, it has accommodation for about 40 boys and girls.

"The change in the children, from the early days of their stay at Highcroft is most marked in every case," writes one of the workers, "and they blossom out both physically and mentally in their happy country life. Dark shadows of broken homes and bombed out areas are behind them and they are learning the lessons which will remain with them through life."

This nursery was taken over by the Elks when the building which housed Long Barn nursery in Kent was sold. The Canadian and Newfoundland lodges had guaranteed to support the Long Barn nursery for an indefinite period.

At the Elks' Grand Lodge convention held last month in Regina it was unanimously agreed to continue the support of small British war victims through the Save the Children Fund. Within the past two years Canadian and Newfoundland lodges have contributed more than \$55,000, an average of \$425 each.

Another generous contribution of \$250 was made for this work last month by the Women's Institutes of Ontario.

As a member of the newly-formed Canadian council of voluntary relief agencies assisting the UNRRA, the fund's Canadian committee has agreed to finance a number of Canadian relief workers and also sponsor a team of British workers at a yearly cost of \$15,000.

... V ...

## Thank You

It affords me great pleasure to thank all the good citizens of Pincher Creek-Crows Nest constituency who worked so hard for and voted for the cause we espoused in 1935. Aberhart's voice is with us yet. Victory at the polls has been won once again. Let us go forward together with the battle cry "On To Ottawa." Zealously striving to serve you.

Faithfully yours,  
E. O. DUKE, M.L.A.

## Cigarette Fund Notes

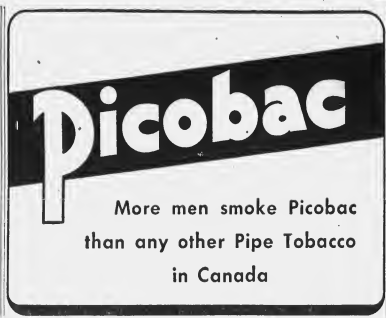

Dear Sirs: Received another shipment of cigarettes, and they are ever welcome! I don't know what we would do for smokers were it not for wonderful organizations like the Legion—J. L. Larimore.

Dear Friends: Just received 600 Sweet Cops and 300 Winchester cigs, for which I thank you. Jasper Jones was up to see me. He is looking very well. I received a letter from Walter McLeod, who is somewhere in Italy, but I've not had time to look him up. Best regards to all.—H. Hirsch.

Dear Members: Many thanks for your gift of cigs. This was the second parcel I have received from you since arriving in France. They are even more welcome than they were in England, if possible. We certainly appreciate what you are doing for us.—Sincerely, O. Hirsch.

Dear Sirs: Have just received another consignment of cigarettes. Not once since I arrived over here have I been out of smokes, thanks to you. Things in general seem to be looking much better, so we hope it will all be over in the near future. Best regards to all.—Cpl. Alfred Jones.

**Picobac**

More men smoke Picobac than any other Pipe Tobacco in Canada

## Canada's Forests

CANADA IS A COUNTRY of vast natural resources, many of which have as yet only begun to be developed. There is, however, one national asset which has been used since earliest times, and which now must be carefully conserved if it is to continue to hold its present important position in our economic structure. This asset is our forests. It is estimated by the Dominion Bureau of Statistics that there are in Canada more than 1,200,000 square miles of forest lands. This constitutes a large proportion of the total area of the Dominion, in fact, fifty-eight per cent. of the land in the nine provinces is taken up with forests, as compared to fourteen per cent. which is used for agriculture. Much of this forest land is situated in the Prairie Provinces, mainly in the northern sections.

### Supports Half Of Population

It is estimated that the proceeds of Canada's forests are sufficient to support half the population of the Dominion, and that outside of mining, there is at present no industry which contributes so much to our national income. This contribution might be much greater were it not for the fact that a large part of our forests are considered inaccessible because of the expense and difficulty which would be involved in reaching them. Canada has 313,000 million cubic feet of timber suitable for commercial purposes, but of this only about two-thirds is accessible. Another factor which reduces the yield from our forests is fire. Forest fires annually take a grave toll, but progressive methods of fire prevention and control are helping to make these disasters less frequent. Indiscriminate exploitation of the forests in early times has also served to make present supplies of timber less plentiful, but modern methods of forest administration which have been in effect for some years, have largely eliminated this evil.

### New Uses For Wood Products

There has been considerable interest recently in a new chemical process which is claimed to give softwood the desirable properties of hardwood. About seventy per cent. of Canada's timber is of the softwood variety, and Canada is the principle source of supply for softwood in the British Empire. Softwood trees include several types of trees, many of which are found in the forest areas of the Western provinces. Scientists have also developed methods of making durable materials from sawdust, shavings and other wood wastes, and new uses for wood products are constantly being discovered. Many of these developments may prove of importance here, and it appears that we can look forward with great interest to the future of our forest industry.

## Nervous, Restless

On "CERTAIN DAYS" of the Month? If functional periodic disturbances make you feel nervous, cranky, impatient, tired, weak and "drained out" at such times—start at once, try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Here's a product that will give you definite directions. Pinkham's Compound is worth trying! Write for yours today!

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

### North Africa Crop

Reported To Be One Of The Worst Failures In History

The Allies will not only have hungry Europe to feed next year, but will be faced with the problem of making up for one of the worst crop failures in North African history, if French estimates that wheat and barley production will drop 700,000 tons under last year's crop are borne out.

The annual average crop in North Africa in recent years has been 3,500,000 tons, which usually provided a substantial surplus for export purposes, but last year's crop was 40,000 tons short of filling North African requirements alone.

The causes for the coming failure began when Allied landings distracted farmers from proper plowing at the end of 1942. Then the sowing season last winter was first too wet and then too dry, due to which 25 to 30 per cent. less of the surface was sown.

A two months drought in Morocco destroyed almost the entire remaining crop, and the summer following that year was the worst in 50 years—spreading across the Sahara and the mountains as far as coastal Morocco, Algeria and Tunisia.

In 1900 only one woman out of 2,000 wore silk stockings.

with MINARD'S LINIMENT

### Tar Sands

Research Council of Alberta Has Plan For Extracting Oil

Research engineers in white coats bend over a wilches' cauldron festooned with pipes. It fumes and bubbles and, with the technique of a dairy maid, they skim a tarry substance from the surface with a spoon.

In that rite, performed with the skill of long practice, the Research Council of Alberta believes it has the key to open the door to wealth in oil never seen before. By it, engineers demonstrate how oil-rich bitumen can be extracted from tar sands.

It's a long story they tell about the tar sands along the Athabasca River 250 miles northwest of Edmonton. Some say the sands contain 70 per cent. of the world's known oil supplies. Their eyes shine when they tell that for sure there are about 1,000 square miles where the tar sands lie in unknown depth. Perhaps there are 30,000 square miles. No one knows with certainty, for no one has had time to examine all the area.

The actual oil produced from the sands is minute in quantity compared with what it could be, provincial authorities say. What they hope is that a modern plant, using methods developed in Alberta Research Council laboratories, will be constructed soon on the Athabasca, to serve as a model for others to tap the sands over the long rich miles.

They think one efficient provincial government plant will be enough. If the efficiency of the extraction method is demonstrated, they expect private industry will build others. The Dominion government is conducting tests with a plant at the tar sands area now. The Dominion is using methods not exactly the same as those proposed by provincial research officials.

### The Fastest Mile

Speed Artist Who Ran Away From A Bear

In Stockholm, Sweden, the other day, Arne Anderson, a school teacher, ran a mile in four minutes and one decimal six seconds. This is said to be the fastest mile run by man. But that statement is not correct. One Uncle Ted went down into a swamp at the Black Donald one day and stuck his head into a hole to see what he could see. A bear was in that hole and he started to come out. And Uncle Ted started to run. He said for the first mile he only touched the top of the high spots with his feet, but after that he just settled down to running and he was doing forty-five miles an hour on the level when he decided to stop. By that time he had outrun the rabbits, so he said, and he figured that as rabbits run faster than bears he could afford to ease up. —Trenton Courier Advocate.

### School Age

Determining Factor In Deciding When A Child Should Leave School

Age should not be the determining factor in deciding when a child should leave school, Lord Quickwood, Provost of Elton, informed the House of Lords in the debate on the Education Bill. No child should leave school until he could read a page of good English without the slightest effort and explain all the important words in it, he suggested.

Dr. Temple, Archbishop of Canterbury, urged that the size of classes in schools be cut down to reasonable proportions. "It is simply impossible to teach a class of 50 children," declared the archbishop. You can only entertain them."

An estimate places the number of dogs in the world at 70,000,000.

### Up Churchill Way

Linking Western Canada With Europe By Way Of The Atlantic

Scattered throughout northern Manitoba like stepping stones from the settled to the unsettled, United States air bases at The Pas, at Churchill, Southampton and beyond, are miniature cities bright with the lights and humming with the activity only men on the threshold of war can bring.

After more than two years secrecy, the curtain of censorship may be lifted by the Canadian and U.S. governments to permit telling the full story of the construction of these Far North airports, the northeast staging route—linking Western Canada with Europe by way of the Atlantic Ocean.

Churchill, 1,000 miles from Winnipeg, forms the main base consisting of three large runways and a vast expanse of buildings including a modern hospital and movie theatre. A gravelled highway links the base to the war-booming town of Churchill.

The other bases are said to be constructed along similar lines but on a smaller scale. The Americans are reported to have brought increased hospitality to the already famed reputation of the friendly North. The big hangar at Churchill has been filled for dances, and jitterbugging U.S. soldiers have delighted native Eskimos.

### Wildlife Service

Scarcity Of Ducks Has Been Overcome By Government Action

The Canadian government has played an important part in helping to quadruple the continental population of migratory waterfowl during the past few years, and because of this, United States sportsmen owe a "great debt" to them, according to Dr. Ira N. Gabrielson, director of the Fish and Wildlife Service at Washington.

"If the federal government of Canada, as well as the governments of the provinces, had not co-operated so wholeheartedly in the work of conservationists both in the United States and Canada," Gabrielson said, "we could not have alleviated the so-called 'duck depression' as rapidly as we have done."

He explained that Canada set aside "millions of acres" as sanctuaries for ducks, geese, swans and other waterfowl in addition to completing more than 20,000 water projects, ranging from small stock-watering ponds to large storage reservoirs and lakes for the benefit of the waterfowl population.

The "duck depression" occurred in the mid-1930's when the duck population of North America dropped to the "alarmingly low" figure of 27,000,000, it was said, due chiefly to a severe drought and unusually heavy shooting. But because of measures taken by both the Canadian and the United States governments, the waterfowl population of the continent has made a not unworthy comeback since that time.

"Certainly the Fish and Wildlife Service could have asked for no more co-operation than Canada has always given," Gabrielson said. "It has been a good neighbor indeed."

### ORIGINATED IN FRANCE

Because the word is used so frequently in the news columns now it is apropos to point out that sabotage was originated when the French used to throw their wooden shoes (sabots) into machinery.

A nerve runs through the entire length of an elephant tusk, which is really a tooth. It is this nerve canal that is visible on opposite sides of ivory billiard balls.

One sago palm tree produces enough food to keep a native of the Dutch East Indies alive a year.

### New Station Design

The Canadian National railway station of the future. Designed by Chief Architect John Schofield, it symbolizes in field stone and glass the streamline trend of the modern age. The first of this advanced type of station design will be erected at Midland, Ont., to replace the old, wooden structure which was destroyed by fire. The drawing of the front elevation shows the wide use of glass to assure light and airy public rooms and the decorative veneer of field stone and fireproofed cedar boards over the concrete structure.

**RIGHT** for Canada's food needs...now more than ever

Pass the word along—they say C-R-I-S-P!

Save Time...Save Work...Save Fuel!

### Here a CWAC There a CWAC

Personality Lieutenant Barbara Nation, tall, auburn haired C.W.A.C. officer from Vancouver, B.C. was reading her mail from home in England recently when she jumped from her easy chair and whooped with delight. "Guess what! Mom's been promoted to major!"

"Mom" is Major Madeleine Nation, C.W.A.C. officer at headquarters, Pacific Command, and she and her daughter have been side by side from the beginning. They were both members of the British Columbia Women's Service Corps prior to the formation of the C.W.A.C. They went on active service together, and were on the same officers' course and received their commissions in August, 1942.

Now Lieutenant Barbara is overseas in charge of a sub section of the Military Secretary's Branch, has met up with her Navy brother, Lieutenant George Nation, R.C.N.V.R., and has had a reunion with him since his participation in action off the coast of Normandy. Still, she is quite proud of "Mom" and insists, "She is the one you should be writing about, not me."

### WORK—

Radio research is the post-war employment choice of Lieutenant Joan Patricia Bond, formerly of Edmonton, now serving overseas with the C.W.A.C. as a specialist in Radar. Although she is only 22 years old, Lieutenant Bond graduated from the University of London with her Bachelor of Science degree last year, after majoring in physics and radio. Shortly after, she enlisted in the C.W.A.C., took three special courses with the British Army, and is now one of ten highly skilled officers who make up the Technical Liaison Group at Canadian Military Headquarters in Britain. Since leaving her home in Edmonton, Alberta in 1937 to go to England with her parents, she has become quite a scientist. Actually on the last course she was the lone woman among thirty men. Only nine passed with Joan placing second.

Also, she waited for her commission with the C.W.A.C. instead of immediately accepting one with the W.A.A.F.'s. "Because," she explains, "I wanted to be with the Canadians."

### Travel

It all began when two members of the C.W.A.C. stationed at Fort Osborne Barracks, Winnipeg, decided to go on a long bicycle trip and get away from barracks. They wanted sunshine, exercise and sight-seeing. Since they didn't care which direction they went, they decided to follow the Assiniboine river, and started from a spot in the heart of the city. In no time at all they were right back home, because Fort Osborne is on the banks of the Assiniboine and they had followed the flow of the river.

### ROVER—

She might be called a "Refugee CWAC", but to the girls at No. 12 V.T.S., Saskatoon, Sask., she is just Pte. Catherine Corr, a fair-haired girl with a delightful accent. Pte. Corr came to Canada four years ago from her home in Worthington, England, to live with her sister in Hamilton, Ontario. Since being in this country she has visited New York, Buffalo, Niagara Falls, Kiriand Lake district and the West. In New York one of her greatest experiences was meeting composers James Kennedy and Sigmund Romberg. Pte. Corr has two brothers in the services, one in the Royal Navy and another in the R.A.F.

### New Industries

British Government Has Plans For Post-War Reconstruction

Plans of the British Government to locate new industries established in the post-war reconstruction program in what were formerly regarded as the distressed areas of Britain were indicated in a statement by Hugh Dalton, president of the Board of Trade, in a statement to the House of Commons.

"London is not one of the areas where there is most need of development," stated Mr. Dalton. "We will continue in peace time to steer new factory developments into areas where it is necessary to provide employment for the people."

Ships have been launched sideways, in sections, and upside down.

### ITCH CHECKED in a Jiffy - or Money Back

## RECOMMEND THE PRINCIPLE OF PROFIT SHARING BY LABOR IN THE AIRCRAFT INDUSTRY

OTTAWA.—A system of profit-sharing by labor should be studied and applied to all of Canada's aircraft industry, the commons war expenditures committee recommended in a report tabled in the house.

The committee, reporting Canada had produced 12,908 planes up to June 30 with total government assistance to the industry of \$68,000,000, cited the example of the Vickers plant at Montreal where it was found profit-sharing "has increased production and substantially lowered costs."

The committee also found:

1. New aircraft contracts with the United States or the United Kingdom should be for transport planes rather than fighters and bombers, looking to post-war success of the aircraft industry in Canada.
2. There were occasional infractions and isolated indiscretions on the part of army boots inspectors but the Canadian army boot "is now equal if not the superior of any boot supplied to any soldier anywhere."
3. Ownership of the Polymer Corporation synthetic rubber plant at Sarnia, Ont., should be retained by the crown and that the plant be operated after the war by the government.
4. A policy of post-war public ownership also should be applied to the government-owned ammonium nitrate plants at Calgary and Niagara Falls, Ont., to assure supplies of chemical fertilizers to Canadian agriculture.

Standardization of the design and construction of service footwear in the army, navy and air force, where used for similar purposes, was recommended. It said this course would bring about substantial savings in material manufacturing equipment and costs, as well as in the cost of maintaining reserve supplies of footwear.

The committee said it made full inquiry into all aspects of charges made by two former employees of the joint inspection board with a view to ascertaining if any organization changes were indicated. It found no additional inspection safeguards were necessary. Occasional infractions and indiscretions of inspectors had been adequately handled by the board.

## Five Hundred Nazi U-Boats Sunk By Allies

LONDON.—More than 500 German submarines have been sunk by the Allies since the start of the war, it was reported in a joint Anglo-American statement issued under authority of Prime Minister Churchill and President Roosevelt, the statement said Nazi U-boats were "ineffective during July, a month which has been so important for the success of continental operations."

The joint statement follows: "The number of German U-boats sunk during the war now exceeds 500. It is therefore understandable that the U-boats still operating are extremely cautious. Their efforts have been ineffective during July, a month which has been so important for the success of continental operations."

"The number of U-boats destroyed has been substantially greater than the number of merchant ships sunk. Seventeen U-boats have been sunk while attempting to interfere with our cross-channel traffic since the first landing of the army of liberation."

"The U-boat fleet is still of impressive size. Nevertheless the U-boats remain the hunted rather than the hunters. They have been attacked from the Arctic to the Indian ocean, aircraft playing a great part with the surface forces. This pressure will be maintained until all chances of revival of the U-boat campaign are killed, whatever may be the new devices and methods developed by the enemy."

"The Nazi claims of sinkings continue to be grossly exaggerated. For instance, their claim for June, the latest month for which complete figures are available, was an exaggeration of 1,000 per cent."

Stoke-on-Kent is England's foggiest spot, having had 126 days of fog in one six-month period. 2581

### Wins D.S.O.

Lieut.-Col. William Smith Zeigler, D.S.O., (acting brigadier) commanding the artillery of a Canadian division, has been awarded the Distinguished Service Order. A civil engineer in Edmonton, prior to outbreak of war, he is a graduate of the University of Alberta. His wife, Mrs. Mildred E. L. Zeigler, resides at Edmonton, Alta.

### THANKSGIVING DAY

OTTAWA.—Thanksgiving Day will be observed this year on Oct. 9, it was announced in a proclamation published in an extra edition of the Canada Gazette. Thanksgiving Day is one of the six statutory holidays which the government has recommended be generally observed.

PRETORIA.—The annual report of the commissioner of inland revenue states that the total taxable incomes of individuals and companies for the Union amounted last year to £192,000,000 (\$868,500,000).

### WILL NEVER UNITE

But Co-operation Between Canada And United States Is Essential

WINNIPEG.—Ray Atherton, American ambassador to Canada, told a press conference here co-operation between the United States and Canada would never lead to union.

Maintenance of separate sovereignty and independence by Canada and the United States will contribute to the North American way of life, he said. Mr. Atherton stressed the co-operation existing between the two countries and that it would be to their mutual benefit to maintain this close relationship during the post-war period.

### GROWING UP

Canada Reaches Full Stature Among Nations Of The World

LONDON.—The Dominion of Canada has reached full stature among the great nations of the world, said an evening Standard editorial, devoted to the part the Canadians are playing in the war and noting that the creation of the 1st Canadian army "tells the climax of an historic progress."

"It is difficult to recount our debt to Canada; harder still to express our gratitude," the Standard said. "The heroism of her troops in the last war is legendary, her present sons are their worthy successors."

SAN FRANCISCO.—War has passed comparatively lightly over the farm lands of southern Italy, and crop prospects there are so good that exports of food from the United States to Italy for relief have been stopped. Henry F. Grady, who recently completed his assignment as special minister to Italy, said.

## WAR SERVICE GRATUITIES FOR THE BENEFIT OF FORCES WHO HAVE SERVED OVERSEAS

OTTAWA.—Under increased clothing allowances for discharged service personnel and a retroactive \$750,000,000 war service gratuities bill, given first reading in commons, an army private with service of a year in Canada and two overseas would get \$1,077. Here is the basis of the gratuities:

For every 30 days of service in the western hemisphere, which for the purpose of the bill includes the West Indies, Newfoundland and South America, and excludes the Aleutians, \$750;

For every 30 days' service overseas, which includes the Aleutians, Iceland and Greenland, \$15;

Also for each six months of service overseas, including the Aleutians, Iceland and Greenland, seven days' pay and allowances;

And a re-establishment credit.

Those qualifying for the benefits will be volunteer servicemen and women, Canadians serving in other Empire forces who return to Canada within a year after discharge, approximately 150,000 men and women already discharged from active service, drafted men who served in the Aleutian campaign and drafted men who might be forced by order-in-council to serve overseas.

In this latter case their qualifications for gratuities would start from the time they are drafted to overseas service. This same principle will be applied to drafted men who may later volunteer for general service.

After the gratuities resolution was moved and a non-retroactive clothing allowance of \$100 announced, Navy Minister Macdonald gave an example of a private to illustrate how the gratuities— which go to all forces and can be claimed up to 10 years after discharge— would be distributed. For one year's service in Canada,

the private would get \$90 and for two years' service overseas an additional \$300. He also would come on for seven days' pay and allowances for every six months' of service which would give him an additional \$77. He would get a rehabilitation credit equal to his service gratuity or about \$450 and finally the \$100 clothing allowance. The former clothing allowance rate was \$65 compared to \$35 of the First Great War. Prime Minister King, in introducing the bill, pointed out that the servicemen also would come in for benefits under the Veterans' Land Act, educational and vocational grants and various other aids to re-establishment. Casualties would be given various additional compensations, like pensions.

In the last war Canadian gratuities ranged from one month's pay and allowances for one year home service to six months' pay and allowances for any part of three years or more service overseas.

Pensions Minister Mackenzie indicated the various forms in which the re-establishment credit could be used.

Acquisition of a home under the new housing legislation; Repair or modernization of a home owned by the serviceman;

Purchase of furniture and household equipment for domestic use;

Provision of working capital for a profession or business;

Purchase of tools or equipment for trade, profession or business;

Purchase of a business;

Payment of premiums under any Dominion government insurance scheme;

Purchase of special equipment for educational or vocational training;

For any other purpose authorized by the government.

## GREAT BRITAIN AND U.S. SIGN PACT ON WORLD OIL POLICY TO ADJUST COMPETITIVE PROBLEMS

WASHINGTON.—The United States and Great Britain signed an agreement on world oil policy looking toward a settlement of competitive problems, as a contribution toward post-war international security.

The agreement was signed by Edward R. Stettinius, Jr., acting secretary of state, for the United States and by Lord Beaverbrook for the United Kingdom.

It sets up an International Petroleum commission charged with estimating world demand for petroleum and recommending how British and American companies can carry out their production with the view to orderly development of world resources.

Announcing conclusion of the pact, which presumably is not subject to senate ratification, the state department said it is "of an interim character and is preliminary to the negotiation of a multi-lateral agreement on petroleum to which the governments of all producing and consuming countries interested in the international petroleum trade will, it is hoped, become signatories."

Main points in the agreement are: 1. Assurance of adequate petroleum supplies to "all peaceable countries at fair prices and on a non-discriminatory basis subject to such collective security arrangements as may at any time be in force."

2. "Development of petroleum resources with a view to the sound economic advancement of producing countries."

3. "Recognition of the principle of equal opportunity in the acquisition of concessions."

4. "Respect for valid concession contracts."

5. "Freeing the production and distribution of petroleum from unnecessary restrictions."

The agreement, which is the first post-war pact on international trade, was viewed with satisfaction by both American and British officials. They considered it a long step toward eliminating possible conflicts between the two governments and toward establishment of a mechanism with which to enforce peace.

The provision that all "peaceable countries" should be able to obtain plenty of oil was the basis for a ready means of imposing sanctions on the most vital material for war against future aggressors.

### NEEDS MORE TIME

Russia Wants Another Week To Prepare For Security Talks

WASHINGTON.—With the explanation that the Soviet government needs "a little more time" to prepare, the United States has delayed for a week the beginning of post-war security talks here with Britain and Russia.

This action moves the date from Aug. 14 to 21, and, possibly by coincidence, lengthens the pre-conference period in which present negotiations for a solution of Russo-Polish problems may be concluded.

### Canadian Flag On French Soil

With Canadian headquarters set up in France, the Canadian flag flew for the first time on French soil on Dominion Day. Here Lt.-Gen. H. D. G. Crerar, General Officer Commanding-in-Chief of First Canadian Army, is shown taking the salute.

### Attend Investiture

Snapped outside Buckingham Palace after a recent investiture at which he received the D.F.C. from His Majesty, Flight Lieutenant N. Smith of Annprior, Ont., is seen here (left) with Squadron Leader H. V. Peterson, D.F.C. and Bar, of Calgary, Alta., also of the R.C.A.F., who accompanied him at the ceremony.

### Canadian Greets Churchill

Group Captain W. R. MacBrien, Ottawa, commanding officer of the Canadian fighter sector in France, greets Prime Minister Churchill as he arrives on his recent visit to the Royal Canadian Air Force in Normandy. Mr. Churchill has just alighted from the Fiesler Storch which carried him to and from France. The plane, a German make, was captured in Italy and is normally used by Air Vice Marshal Harry Broadhurst, D.S.O., D.F.C., to visit the fields in France which are under his command. A.V.M. Broadhurst was Mr. Churchill's pilot for this special trip. The Prime Minister addressed aircrew and groundcrew at the fighter station and got first hand accounts of the fine job the R.C.A.F. fighters are doing in Normandy.

## Statement Re Grand Union Sewerage System

I am fully aware of the unrest that has been created in the vicinity of our sewerage system and the fact that a petition is at present being circulated in an endeavor to eliminate the contamination that is at present escaping from the system.

Improvement to the system awaits the arrival of provincial sanitary engineer D. B. Menzies, of Edmonton, who is due in Coleman this month. Work will commence immediately Mr. Menzies' recommendations are received by me.

I regret that the system is causing inconvenience to a number of citizens but I am powerless to make improvements till the sanitary engineer makes known his plans.

L. S. Richards, Mgr.

## It Doesn't Leave a Lot for the Civilian

WHEN war demands have been filled... when invasion gasoline, aviation gasoline, Navy fuel oil, petroleum for the manufacture of explosives, synthetic rubber, and gasoline for war industry, farming and essential trucking all have been taken from Canada's oil supply—it doesn't leave a lot for the civilian!

Figure it out for yourself. It takes 5,250,000 gallons of gasoline to fuel 5,000 bombers and fighters for a mission over Germany. It takes enough oil for one fueling of a battleship to heat an average house for 350 years. It takes 18,000 gallons of gasoline to keep one armoured division on the move for one hour.

From petroleum and petroleum gases we obtain the gasoline and fuels needed to power planes and ships and tanks as well as the raw material for acetone, ammonia and toluol for explosives, organic chemicals for anaesthetics, naphthas for camouflage paints and plastics and resins for war weapons production.

This is why civilian gasoline is short. This is why it's up to every motorist, to every owner of an oil-heated home,

to exercise the strictest economy in gasoline or fuel oil usage. Every gallon we can do without here at home is one gallon more for the fighting men. And they need every gallon they can get.

Two full years of gasoline rationing and fuel oil control in Canada have saved 393,000,000 gallons of gasoline and 175 million gallons of fuel oil—a total saving of 568,000,000 gallons of petroleum products. Yet, despite this saving, gasoline stocks on hand in Canada, as of March 31st, this year, were 55,000,000 gallons less than at the commencement of rationing, April 1, 1942.

Oil has a mighty war job to do—yet supplies are short and are constantly dwindling. Oil powers the attack on every front. Oil can mean the difference between success or failure, between light casualty lists and heavy. Oil is vital ammunition—not to be wasted, not to be needlessly, frivolously spent.

### Answering Your Questions about the Gasoline Shortage

What are Canada's total yearly requirements of motor gasoline?... Approximately 800,000,000 gallons. Do these requirements have to cover both military and civilian needs?... Yes. Why cannot this supply be increased?... Because total hemispheric supplies are inadequate to meet both the colossal war demand and civilian needs. There is not enough oil, there are not enough tankers, for both. How much of Canada's petroleum needs is supplied from Canadian wells?... Only 15% Why can't this home production be increased?... Every effort is being made to do so. More new wells are being drilled or prepared for drilling, than at any time in the history of Western Canada, but we have yet to find a new Turner Valley. War does not wait for new production.

We Must Hold  
The Line!

On the home front the battle against inflation is now the most critical of all.

The winning of this battle will contribute much to winning the war.

It will contribute more than all else towards the solution of post-war problems.

The purpose of Price Control is to prevent inflation. Its purpose is to protect and maintain a basic standard of living.

A higher money income will not be of any advantage if, because prices are going up, our money buys less and less. To win the battle against unemployment in the post-war period, we must first of all win the battle against inflation.

Salaries and wages are a large element, often the largest element, in the cost of everything we buy.

If the Price Ceiling breaks down, in the long run all stand to lose.

We must hold the line against inflation to assure victory in war.

We must hold the line to provide a solid foundation on which, after the war, to build a greater and a better Canada.

## WORLD HAPPENINGS BRIEFLY TOLD

Dr. George B. Archer, 65, has been murdered in India where he was superintendent of the leper colony at Perulla.

Six British seamen were sent to prison for a month for being absent without leave for 90 minutes from an invasion ship.

The International Red Cross at Geneva announced that it was endeavoring to facilitate the emigration of Jews from Hungary.

In the first six months of 1944 38 British children have been killed and more than 180 injured through picking up "live" ammunition as souvenirs.

South Africa in 1943 sold gems and industrial diamonds to the value of \$20,500,000 (\$92,250,000). This figure represents an all-time record.

The parliament in Douglas, Isle of Man, voted a war contribution to Britain of \$1,000,000 and decided to lend a further \$1,000,000 free of interest.

New food regulations in Kenya mean that, for the time being Europeans will be unable to buy any rice in the colony. The ration is being cut to three pounds a month.

A method has been developed in Great Britain for treating flexible rope so that it floats from one to 10 days. Cotton, flax, hemp, sisal or viscose fibres may be used.

## SUNDAY SCHOOL LESSON

AUGUST 20

### THE PROPHET IN THE LIFE OF ISRAEL

Golden text: He that hath my word, let him speak my word faithfully. Jeremiah 23:28.  
Lesson: 1 Samuel 3:19-7:17.  
Devotional Reading: Ezekiel 3:16-21.

**Explanations and Comments**  
Samuel Becomes a Prophet, 1 Samuel 3:19-21. The birth of Samuel and an account of his being given to the service of Jehovah by Hannah his mother are recorded in the first chapter of First Samuel. In verses 1-18 of the second chapter is the record of his vision with his prophecy against Eli's house because of the "iniquity which he knew, because his sons did bring a curse upon themselves, and he restrained them not." Samuel told Eli "everything, and hid nothing from him." And he let Eli know that Jehovah let him do what seemed him good.

And Samuel grew and Jehovah was with him; compare the words of the Child Jesus in Luke 2:52—And Jesus advanced in wisdom and stature, and in favor with God and man. And did let none of his words fall to the ground; his words were all true. And all Israel from Dan even to Beersheba—an expression often used in the Bible for "from one end of the land to the other"—knew that Samuel was established to be a prophet of Jehovah. A prophet was one who spoke for Jehovah. God had chosen Samuel, child that Samuel was, to declare his condemnation of Eli's house, and all Israel knew that Samuel was a prophet to whom Jehovah revealed himself in Shiloh.

"A splendid reputation was that, and the nineteenth verse gives the reason. He had not remained a boy in mind, spirit, purpose. He had grown, and as he grew he had maintained such a relation with God that God could support him, use him, make him a servant of all Israel, a messenger to speak for him, a prophet. This reputation would soon become of immense importance to Israel, for it would enable Samuel to do a great service for his country, for no man can do such a service unless the people trust him, and reputation is the basis of trust." (Robert W. Rogers)

Samuel brings about a Spiritual Revival, 1 Samuel 7:3-6. Religious life had come to a very low ebb among the Hebrew people before the great awakening under Samuel took place. They were worshipping the gods of the native peoples about them, and most immoral ceremonies sometimes accompanied their worship. The situation was very serious, and had not a great leader like Samuel appeared to lead the people back to God, the story of Israel's after life might have been very different.

### GAVE IT BACK

A British seaman whose ship took Canadian soldiers to France won \$360 from the Canucks playing poker on the way across the Channel. When the ship returned to port the seaman asked his captain for an advance as he was "broke". He had spent all his winnings buying cigarettes for the soldiers.

### FAST BRIDGE BUILDING

Sappers of the South African 6th Armored Division in Italy built 26 bridges with a total length of 1,690 feet in 22 days making 33 diversions along the route of the division's advance.

Thomas Gainsborough painted his famous "Blue Boy" to disprove a statement that blue should not be massed in a painting. 2681

## Telling The World

We Seek No Territory That Is Not Our Own

The other day in Normandy, Prime Minister Churchill told some hundreds of airmen gathered around him:

"We have fought for honor and we seek no reward. We seek no territory; we desire no oil fields; we seek nothing that is not our own. But what is our own in the Commonwealth, that we don't want other people to express an opinion about. That we will firmly retain."

That is a reaffirmation of what Mr. Churchill formerly said, to the effect that he did not propose to preside over the government of His Majesty to see the liquidation of the British Empire.

The forces of the farflung Empire, once regimented and organized, have helped to keep tyranny at bay. But in the first place, Britain saved the world in 1940 and when the peace comes is certainly not going to disintegrate, nor British world influence and interests be dissolved. What Britain did in 1940, alone in all the world with scant resources but magnificent courage, really put unborn generations of people in the United States under eternal obligation. History will so record it.

Men of the mould of Churchill will keep the Empire as a going concern. And in 1,000 years Britain herself has never stood so high, so undaunted, as of today when there is so great a promise over the triumph of evil—St. Catharines Standard.

## Took Vow Of Silence

For Fifteen Years Indian Prince Refused To Speak

The death has taken place near Bulawayo of the youngest son of Lobengula, the last King of the Matabele. For the last 15 years of his life he refused to speak to anyone, reports the London Times. Educated in England at the order of Cecil Rhodes, Ngunyonye spoke English fluently, but on his return to the colony 20 years ago he found he had lost touch with the customs of his people and their way of living. He expected to return to a position of authority, but the chiefs of the Matabele royal house opposed him and he eventually became a dependent of the Government and lived a life of seclusion. He rarely left the house, spending most of his time reading English literature. Embittered and estranged from his people, he took the vow of silence and all efforts to make him speak on the part of both Europeans and natives failed.

## Returns To Canada

Commanding Officer of R.C.A.F. Bomber Group's largest base overseas, Air Commodore A. Dwight Ross, O.B.E., was greeted by his wife and daughter Susan, when he arrived in Winnipeg recently by air from Britain. Early in July he was injured while rescuing the crew of a flaming bomber of the Alouette Squadron overseas which crashed landed into another aircraft loaded with high explosives. The crew were saved to a man, only a few suffering minor injuries, while Air Commodore Ross lost his right hand in the accident.

Air Commodore Ross was born in Winnipeg, son of Mr. and Mrs. D. A. Ross, 117 Harvard Avenue. He attended Upper Canada College, Toronto, and Royal Military College, Kingston, graduating in 1928 and entering the R.C.A.F. Prior to going overseas he was Commanding Officer of the R.C.A.F. station at Sydney, N.S., and previously had been Commanding Officer, No. 3 S.F.T.S., Calgary. In 1935 he married Miss Marguerite Wynn of Yorkton, Sask. They have two daughters, Susan (7) and Nancy (2).

## Plans For Future

No Worries About Making A Living In Britain After The War

Servicemen and women in Britain need have no worries about making a living after the war a recent survey disclosed. Every industry in Britain, from tooth pick-making to bottling pickles, has its plan for retraining men and women now in uniform.

Great industrial organizations are organizing schools to bring returning employees "up to date" with developments that may have cropped up since they left. Even the Board of Education is planning 100 new training colleges to produce 10,000 teachers a year capable of giving vocational education to men and women.

Steps also have been taken to provide the men and women with funds while they take these courses. Grants up to \$5 a week will be made.

## Link With Canada

British Writer Wants To Develop Better Understanding Between Our Countries

New means of transport, air transport especially, will place the Dominion of Canada within easy reach of us all after this war. We must do all that lies in us to use its possibilities, says Edinger in the London Daily Mail.

If there is one export to Canada that we should subsidize, it is visitors. Visitors from ex-service associations, and women's guilds, and trades union, and schools. We should establish scholarships for British youth at Canadian colleges and for Canadian youth at British colleges. We should set British holiday camps in Canada and Canadian holiday camps in Britain.

We have to continue to make Canada at least as well known to Britain as Britain is to Canada, and in the post-war years we must continue to develop that mutual understanding between Canada and Britain that has grown up so strongly during these years of war. For only this can equip us to make the utmost of the destiny that has linked the greatness of our peoples.

## Frame Was All Right

But No One Wanted To Buy Picture Of Hitler

At a public auction in Gothenburg, a large picture of Hitler was put up. "What am I offered for this fine painting?" asked the auctioneer. "One ore (one-fourth of a cent)," said a bidder. The auctioneer explained that the frame of the picture was well made and well gilded. The frame and picture were finally sold for one krona (about 25 cents).

### MUST LIKE EGGS

Ed. Schmidt, a trapper at Churchill, Man., believes he is the soft-boiled egg eating champion of the north. He bet \$10 he could eat 36 eggs. Fellow-trappers paid the bet. Schmidt said he was in "training" for a new contest—40 eggs at a sitting and a bet of \$100.

### WANT TERRITORY RETURNED

Dr. H. H. Kung, vice premier of China, said in a broadcast that China will ask for return of Manchuria, Formosa and the Pescadores as a promise for final peace with Japan.

In colonial days, the American Indians dried and smoked oysters.

## Continued Research

Co-Discoverer Of Vitellin Was In Canada As Refugee

Dr. Hans Emanuel Neumann Enoch, co-discoverer of vitellin, was in Canada only a short time before he perfected this medicinal wonder drug, and would probably have remained in this country if he had been permitted to remain here as a refugee, it is revealed by Saul Hayes, national executive director of the United Jewish Refugee and War Relief Agencies. Dr. Enoch was one of the refugees from Germany who had been indiscriminately interned in Great Britain after Dunkirk and shipped to Canada as interned refugees. They were kept in confinement in camps here for some time. A number of them were released on a temporary basis in the Dominion. Dr. Enoch was among those who returned to Great Britain where he was released and continued his research.

Wild dogs of Asiatic countries are not as closely related to domestic dogs as are wolves and jackals.

## A Wise Blackbird

Knows How To Make Hard Crust Easy To Eat

Mrs. O. W. Hamby of Elmira, Ont., whose hobby is to feed the birds in her back garden, is convinced at least one blackbird is not so dumb. She had tossed out a hard crust and a blackbird found it too tough to tackle.

The bird carried it in his beak to a small rocky fish pond in the yard and there dunked his breakfast, carefully holding the corner of the crust. When the bread was moistened he dragged it up the bank and went on with his meal.

### MET ENEMY PLANE

Airmen in No. 1 Training Command are telling a story of a student airman flying from Kingston to Toronto who was horrified to see the outline of a Focke-Wulf 109 heading toward him over Lake Ontario. He quickly banked out of its path only to discover it was a model plane which had got away from its owner.

### OUR COMPLETE SHORT STORY—

## The Hands Of Women

By MARCIA DAUGHTREY  
McClure Newspaper Syndicate

While Andrew studied formations under his magnifying glass, Myrtle squinted against the brilliant sunlight flooding The Garden Of The Gods. Seated in the shadow of one of the towering sandstone pinnacles was another woman, so Myrtle picked her way through the wild flowers and talus slopes to her side.

"Isn't this a heavenly day?" she said by way of approach. The other woman, Myrtle calculated, was approximately her own age; her hair, naturally curly, was combed in soft grey waves away from her forehead. Her sensible shoes, and her wedding ring was an old-fashioned wide gold band. Married about thirty years, Myrtle thought.

The woman glanced up and smiled. "Colorado days are usually glorious," she agreed. "My husband and I—he's over there taking some colored pictures—are from Seattle. We have so much fun at home that this abundant sunlight is like our dreams of the Sahara."

"Do you happen to know the Smiths, the Roger K. Smiths, of Seattle?" Myrtle asked eagerly.

The woman considered. "No... I'm afraid I don't. Do you know any other Seattle people?"

Myrtle didn't. "My husband and I are from Pulaski, Tennessee," she said.

"Pulaski? You must know the Abbott Elderberry family," the other suggested. "My brother married Abbott's sister."

Myrtle settled herself beside the woman. "Now if that isn't a coincidence! My husband mentions Abbott Elderberry quite often." She didn't add that Andrew had tried for

years to get the Elderberry account. Elderberry was one of the most successful general contractors in the South, and as a permanent customer he would have brought steady work to Andrew's cabinet manufacturing shop.

The women fell into easy, deeply feminine chatter after the opening skirmish to establish specific backgrounds. They talked about their children, and discovered that each was expecting a grandchild. Myrtle supplied a recipe for hollandaise with horseradish, and received in exchange a sure-success formula for chocolate-mocha cake.

It was a fascinating conversation, and Myrtle—in obedience to Andrew's call and gesture—arose reluctantly. "Meeting you has been a pleasant experience. Andrew and I are going on to Yellowstone, so our paths may cross again."

The woman said she and her husband had just come from Yellowstone and were on their way to the Carlsbad Caverns. "But the world is a narrow place—we'll see each other again," she said, waving good-bye.

"In the name of goodness, what were you talking about with that strange woman?" Andrew wanted to know.

Myrtle told him brightly, undaunted by his shaking head. "You certainly do defeat me," he grumbled. "You pick up someone wherever we go. Asking if they know this family or that. Asking if they've been to such and such a National Park. If you aren't a busybody, I never saw one."

This displeasure of Andrew's, this aloofness, never failed to give Myrtle a few unhappy moments, but it never deterred her from that instinctive offering of friendship to a strange woman. Despite their years of contented marriage, there were many of her personality traits of which Andrew violently disapproved. Speaking to strangers was only one. Refusing the personal column in a newspaper was another. Exchanging recipes and boasting about the children were others. "I suppose I'm an awful doer," she said, borrowing from her son's vocabulary.

Not until they reached the hotel that night did Andrew discover that one of his wallets was gone. It had contained quite a sum of money, but some valued keepsakes. Family pictures—two of his time-rubbed first place college ribbons—and absolutely no identification.

"Are you sure you didn't have a business card or something?" Myrtle breathed.

"Not a blasted thing. I have thought that I should ink in my name and address, but I've never got around to it..." A frown creased his forehead. "By the way, that wallet was in my coat pocket, and we were taking care of my coat."

"But I was so careful. The only time I put it down was when I was talking to that lovely woman..." And, Andrew, you don't think... But she couldn't have. I never looked away for a moment," Myrtle added, in all fairness. "Except when she pointed out her husband taking picture down in that meadow. Oh, Andrew, I can't believe..."

"Let's not discuss it," said Andrew. "I've warned you often enough." They had been home a week when, at dinner, Myrtle served Andrew a plate on which rested the missing wallet. "If this is a joke, I don't think much of it," he said, but he was laughing. "How come?"

"Well, darling, I was reading the Personals yesterday—yes, I said the Personals—and I found one asking the woman who had given a stranger a hollandaise sauce recipe in The Garden Of The Gods to get in touch with Mrs. Abbott Elderberry. The woman—her name is Mrs. Branch—had found the wallet after we left, so she thought of sending it to Mrs. Elderberry. Then Mrs. Elderberry put a note in the Personals, because she always reads them and she thought the owner of the wallet might, too. And dear, Mrs. Elderberry wants to come over for dinner Saturday night!"

She added, "I do hope you like Mr. Elderberry, because Mrs. Elderberry and I are good friends already. But then, it's so much easier for women to establish understanding than it is for men. Sometimes I think the hands of women could unite the world."

### A YOUNG VETERAN

With 31 bombing missions over Europe to his credit, war veteran Sgt. Desales Glover—aged 16—is home in Pittsburgh, discharged from the army when his officers learned he had enlisted at the age of 14. He reached Britain in January with the U.S. 8th Air Force, and won the Distinguished Flying Cross, the Air Medal with four oak leaf clusters and the Purple Heart.

A pigeon's flying muscles represent one-half of its weight.

### Sixth Winner V.C.

The late Capt. F. T. Peters, a Canadian and native of Prince Edward Island, who served with the Royal Navy, has been awarded the V.C. making him the sixth Canadian to be so honored. He earned the award by forcing a boom at Oran during the North African landings in November, 1942. He was the only survivor. His death occurred later when his plane crashed into the sea.

### Chinese Industry

A Prosperous China Will Be A Necessary Condition Of Peace In The East

Dr. H. H. Kung, vice-president of the executive Yuan and minister of finance in the Chinese government, said that China is undergoing an industrial revolution even while the war is going on and expressed hope that in the post-war period the United States would play a much larger part in its economic development.

Dr. Kung spoke at a dinner given in his honor by the China-American Council of Commerce and Industry. "In the post-war world which is now rapidly emerging," he said, "a prosperous China will not only be a good market, but also will be a necessary condition for the maintenance of peace in the Far East."

### SMILE AWHILE

"When your son has completed his studies, what will he be?"  
"Oh, about 78 years of age, I should think."

Customer—My watch won't run, I'm afraid I made a mistake when I dropped it.  
Jeweller (examining watch)—You made two mistakes; the second one was when you picked it up.

"Mother, do people ever get punished for telling the truth?" asked little Willie.  
"No, dear, of course not," was the reply. "Why do you ask?"

"Because," answered Willie, "I've just taken the last three tarts from the pantry."

"I hear you and your wife had a few words."  
"And I still have mine. I never had a chance to use them."

"Were you annoyed because I sharpened my pencil with your razor?" asked his wife.  
"I was annoyed twice," replied the candid husband. "Once when I tried to shave with the razor, and again when I tried to write with the pencil."

Doctor—Well, madam, what your husband needs is absolute rest from worry.

Lady—But, doctor, he simply refuses to listen to me.

Doctor—An excellent start, madam, an excellent start.

A commercial traveller got held up in the Orkney Islands on account of bad storms and sent a telegram to his firm in Aberdeen saying: "Marooned by storm. Wire instructions."  
The reply came back: "Start summer holidays as from yesterday."

"You don't make very good music with that instrument," said a bystander to the man with the bass drum as the band ceased to play.  
"No," admitted the drummer. "I know I don't; but I drop a heap of bad music."

He (on the telephone)—Hello, dear. How about us having dinner together this evening?

She—I would love it.  
He—Well, tell your mother I'll be over about 7 o'clock.

## Post-War And The Farmer

By T. J. HARRISON

(Note—This is the third of a series of comments by well-known prairie authorities, writing expressly for the Weekly Press of Western Canada.)

"Tom, I'm sold on soil conservation."

This curt all-meaning statement was flung at me by a farmer in Western Manitoba during a recent visit to his farm. And without waiting for a reply he pointed to a nearby field, adding, "See those long narrow trenches, sheersing gulleying they call it. That's all come in my lifetime. Over on the far side of the section where that large field is hilly, the top of the hills are now white and all the silt has been washed down into the hollows. I get good yields from the lowlands but hardly anything grows on the higher grounds that show this deterioration."

"I'm not a technical man but I'm practical enough to know that my land is taking a licking and unless something is done to remedy it, it's not going to be able to support me and my family. My father always got good crops from almost every section of the farm. We didn't know what erosion was in those days but I guess it was going on unnoticed by most of us farmers until the experts put us wise."

In the next breath he put me on the spot by asking how many farmers in Western Canada practise soil conservation. I told him I could not answer his question but agreed with him that they were far too few in number. I did indicate, however, that more and more farmers are taking a keener interest in soil and water conservation practices, although some still appear reluctant to take the matter seriously. I was going to cite numerous instances where this work was an immediate need but this was not necessary. He had plenty of visible evidence and readily recognized it.

He went on to say how he was going to seek expert advice and mentioned the P.F.R.A. Professor Joe Ellis of the University of Manitoba, and a lecturer who did similar work in Saskatchewan and Alberta.

"I don't know what they'll tell me to do, but if it's at all possible and not too costly over a period of years, I'm going to see that I save my soil."

"That's what a large percentage of my wartime savings are going to be used for as soon as I can get the help, labour and advice to carry out the project. It's going to be a mighty tough job to try and restore the soil to the condition in which I first remember it," he asserted. "But I'm certainly going to try."

This farmer pointed out to me that he was in a little better position with respect to equipment and buildings than some of his neighbors. He didn't boast but describing it as a piece of luck. He had bought a new tractor and combine along with one or two other pieces of farm machinery prior to the outbreak of war. His buildings were a little newer than most of those in the community.

He didn't suggest that he wouldn't have to make repairs to his buildings and buy new machinery, but he pointed out that his own expenditure for these requirements would probably be relatively small.

"That's why," he continued, "I'll have most of my wartime savings available for soil conservation work and it's not all going to be spent at once because I understand this has to be planned now over a period of years to be wholly successful in the final analysis."

I left the farm shortly after, doing more thinking on this particular subject than I had done for a long time. Here in my opinion was one of those many farmers to be admired who are sanely and systematically mapping out their varied post-war projects today so that they can start this work as soon as post-war conditions warrant.

I tried to visualize how many things could be done with wartime savings to improve living conditions and other factors affecting farm life. I realized they were numerous and tried to decide which would bring the greatest benefits, but I recognized that some farmers have more than one problem to cope with in post-war planning and spending and the most urgent requirement would have to come first.

As I continued my journey I couldn't ignore the sane reasoning of my farmer friend. The heavy June rains in that part of the province this year had left their mark, further emphasizing the need of soil conservation. I asked myself how

### Speaking Of Snakes

Pythons Have A Price Ceiling In Australia

Even pythons have a price ceiling in Australia. At a zoo conference recently, the first ever held in Australia, the price for pythons was fixed at £1 a foot. For smaller varieties of venomous snakes the price was fixed at 5s. a foot. Delegates from all zoos in Australia, including the Melbourne aquarium, attended the conference. They stated officially that the voluntary price-fixing for animals was an important matter decided upon. In future there will be no bidding by zoo against zoo.

The conference recognized that there will be a "wild scramble" to Africa and South America from all over the world for zoo animals after the war. Right now there is a shortage of jungle animals. Conference secretary H. B. Brown, said, "We're practically out of zebras, there's only an occasional hippo, and only one rhino remains."

### SELECTED RECIPES

#### GOLDEN POPOVERS

(A real butter saver)

1 cup sifted all-purpose flour  
1/2 teaspoon salt  
1/2 cup milk  
2 eggs  
1/2 teaspoon melted fat (optional)  
Sift flour; measure. Sift together with salt into bowl. Add milk gradually, beating constantly with spoon. Beat eggs very thick; add to smooth batter. Add melted fat. Beat mixture vigorously with rotary hand or electric beater for at least two minutes. Grease sizzling hot muffin tins or heavy pyrex cups and fill at once (3/4 full) with popover batter. Bake in hot oven (450 degrees F.) for 25 minutes, then reduce heat to 350 degrees F. and bake 10 to 15 minutes longer. Yield: 8 to 9 medium popovers. Serve hot with salad or other suitable luncheon or supper dish.

#### Whole Wheat or Graham Popovers

Replace the 1 cup sifted all-purpose flour in above recipe with 1 1/2 cup sifted whole wheat or graham flour.

#### NUTRITIONAL LABORATORY

The Imperial College of Tropical Agriculture is developing a nutritional laboratory to cover research problems of nutrition in the West Indies, through Dr. John Duckworth, senior lecturer in animal husbandry and former lecturer at the medical school of Aberdeen University.

#### LIKED LEMONADE

Lemonade was a favorite beverage of the Mongol emperors, who appointed a special high rank official to prepare the drink, which was believed to have curative powers.

Many farmers are planning to use their savings as advantageously in post-war years as this one had voluntarily outlined.

### Cannot Bomb Oceans

Command Of Seas Gives Any Nation The Upper Hand

A. J. McWhinnie, in BBC War Review, says: "The only real—really dependable—interior lines are the sea-lanes. You can bomb and batter roads and railways until they are at any rate temporarily unusable. But you can't blow up the oceans. Unless you command the seas yourself you cannot stop your enemies from bringing in by sea more troops, arms, and ammunition in a day than you can bring overland in weeks. Look back at the North African campaign. Rommel's men with only 200 miles of sea to cross were beaten by the British troops brought 12,000 miles by sea. Men and materials were taken on that long 12,000-mile voyage in such vast quantities that the Axis forces were overwhelmed."

### This Week's Pattern

By ANNE ADAMS

Look pretty, cool, fresh, in this frock, Pattern 4843, with just a hint of sleeves, lovely airy neckline, and easy side-button closing.

Pattern 4843 is available in misses' sizes: 12, 14, 16, 18 and 20. Size 16 takes 3 1/2 yards 39-inch material; 4 1/2 yards 44-inch.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermid Ave., E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

#### CHIEF WAS SURE

One Solomon Island native chief, says Cmdr. Myron W. Graybill, U.S.N., is positive the Japanese force that occupied his domain had a woman with them. Graybill said he asked the chief how he could be so sure and was told: "I ate her."

Canada has an estimated 3,500,000 industrial workers, according to a 1944 survey.

# MACDONALD'S BRIER

Canada's Standard Smoke

## "Gentle way to stop constipation"

"Believe me, you should try ALL-BRAN for constipation—if it has the same cause mine had. For nothing I tried keeps me so regular, so gently."

No dosing—no nasty harsh purgatives. Here's all you do—if your constipation is due to lack of "bulk" in the diet. Simply eat KELLOGG'S ALL-BRAN regularly, and drink plenty of water. This nutritious cereal helps to produce smooth-working "bulk", and prepare wastes for easy elimination. You'll like the happy relief so much you'll want to stay regular. Eat tasty, tasty ALL-BRAN daily. Grocers have it in 2 handy sizes. Made by Kellogg's in London, Canada.

## Mission to Moscow

**Urgent Message**

**TELEGRAPHS**

MR. CONSUMER: ADEQUATE SUPPLIES AVAILABLE OF ALL GOODS NEEDED TO KEEP YOUR FAMILY FIT. FAIR DISTRIBUTION ESSENTIAL. DON'T OVERBID FOR YOUR SHARE. NON-ESSENTIALS MUST WAIT UNTIL WAR WON VICTORY HAS FIRST PRIORITY. PRICE CONTROL NEEDS SELF-CONTROL.

GOVERNMENT OF CANADA.

MR. WORKER: PRICE CONTROL ESSENTIAL TO PROTECT YOUR COST OF LIVING. PRICE CONTROL REQUIRE WAGE AND SALARY CONTROL TO PREVENT INCREASED PRODUCTION COSTS. SOONER OR LATER ALL WORKERS LOSE BY INFLATION.

GOVERNMENT OF CANADA.

MR. FARMER: ESSENTIAL TO HAVE CEILING ON FARM PRICES. DEFLATION AND DEPRESSION LATER. FUTURE OUTLOOK FOR STABILITY IS FAVOURABLE WITH CEILINGS ON TOP AND FLOORS BENEATH.

GOVERNMENT OF CANADA.

MR. BUSINESS MAN: VITAL THAT PRICES TO CONSUMERS THAN EVER BE INCREASED. MORE NECESSARY AND GOOD MANAGEMENT. INFLATION DOES NOT BANKRUPTCY.

GOVERNMENT OF CANADA.

MR. LANDLORD: RENT IS A MAJOR ITEM IN THE FAMILY BUDGET. IF ALLOWED TO RISE, COST OF LIVING RENTS WOULD BE HIGHER. WITHOUT CONTROLS YOUR COSTS OF OPERATION -- BUT SO WOULD ALL DOLLARS WOULD BUY FAR LESS.

GOVERNMENT OF CANADA.

**TO PREVENT INFLATION - NOW AND DEFLATION, ... LATER**

**COSTS WAGES PRICES PROFITS**

Controlled prices, wages, costs, profits mean security

**WAGES PRICES PROFITS**

If one breaks through ...

**INFLATION INFLATION INFLATION INFLATION**

Soon all would break through . . . And stability would go all to pieces

**WE CAN ALL HELP BY SUPPORTING CONTROLS OVER PRICES, WAGES, RENTS AND PROFITS**

LISTEN TO "IN THE SPOTLIGHT" RADIO PROGRAMME  
EVERY SUNDAY NIGHT 7.30 p.m. E.O.T.

This is the tenth of a series being issued by the Government of Canada to emphasize the importance of preventing further increases in the cost of living now and deflation later.
